WORK EXPERIENCE

Associate Engineer

Virtusa consulting services

12/2021 - Present

Bangalore

Achievements/Tasks

- Created few api for different kinds of operations using java springboot framework,data jpa and used mysql with it during training period.
- As a part of Advitium Transformation project i worked on data migration in oracle db ,writing oracle queries,doing manual testing,resolving errors .Identified and tracked defects and supported developers in resolving problems by completing additional tests.

PERSONAL PROJECTS

My Portfolio (05/2023 - 05/2023)

- I have created my portfolio using React.js, incorporating various React libraries, HTML, and CSS. The portfolio showcases my projects, skills, and experience in a visually appealing and interactive manner. It serves as a comprehensive representation of my work as a developer.

Student Course Management (03/2023 - 03/2023)

- The student course management app uses ReactJS, Spring Boot,Data Jpa and MySQL for a comprehensive solution. It enables CRUD operations for student course records and includes a robust search feature for easy retrieval based on criteria like name and ID.

COVID-19 Website (01/2021 - 05/2021)

- In this project it have all the stats of covid cases all over the world and for India also it have stats of covid cases state wise. This site also consist of frequently asked questions answer and health tips how to protect yourself from it and at it also have news section where every days it tell the news around the globe.

Car Parking System (12/2018 - 05/2019)

- The car parking system displays a green box if the parking place is available and a red box if it is occupied. It records the entry time when a vehicle parks and updates the box to red. It also records the checkout time when the customer leaves the building. The system offers search functionality based on time, car number, and color for easy vehicle retrieval.
